Chairman	Andrew Allner

SIG is a leading supplier of specialist building materials to trade customers across Europe, with strong positions in its core markets as a specialist distributor of insulation and interiors products, a merchant of roofing and exteriors products, and a provider of air handling solutions.

The Group provides a key service to the construction industry, ensuring that its customers receive the right product, in the right place at the right time. It operates across the UK, Ireland and Mainland Europe; employing around 8,000 people. The Group's strategy targets the creation of long term value through delivery of the operational and financial transformation of its businesses.

SIG is actively covered by 16 investment analysts, 14 of whom provide a full set of forecasts for 2019 and 2020. These are anonymised to form the basis of this analysis. The analysis provides detail on forecasts for the following four key financial metrics; PBT, EPS, DPS and Headline Financial Leverage. The level of adjusted PBT forecast in each year is used to set an order for the analysts (largest estimate to smallest), and this ordering is maintained in all charts so that it is easy to follow Analyst X's forecasts down the page.

SIG published its audited final results for the year ending 31 December 2018 on 8 March 2019. The annual report and accounts can be found [here](#). Further, the Group has provided a trading update this morning ahead of its Annual General Meeting, which can be found [here](#).

Medium Term Financial Targets*
